6 AIRBAGS (DUAL FRONT, SEAT SIDE & CURTAIN)

ACE™ stands for Advanced Compatibility Engineering™, and it's a Honda-exclusive body design that uses a network of front frame structures to absorb and deflect the energy from a frontal collision. This helps reduce the force transferred to the cabin and more evenly disperse the forces transferred to other vehicles involved. That means it's not just Honda drivers that are safer in the event of a collision-it's everybody. The New City e:HEV has secured a 5 star rating in internationally acclaimed safety standards for the City manufactured and tested in Thailand^{##}. Add to this the world's first i-SRS Airbag System with Quick Deployment Technology and the 1st in Segment LaneWatch camera system.
