

How to get best air conditioning from your HONDA?

- 1.** For best effectiveness, always use Recirculation Mode.
- 2.** Always switch ON the AC in Low Mode and gradually increase the speed.
- 3.** If parked in the hot sun for long, open all the windows completely to vent the hot air out before switching On the AC.
- 4.** Use Front Shades for the windshield to keep your car cabin cooler when parked in hot sun.
- 5.** Always park your car in a shaded region
- 6.** Always use Honda Genuine Refrigerant.
- 7.** Always switch OFF the AC before switching OFF the engine.
- 8.** Follow the Periodic Maintenance Schedule religiously.
- 9.** Adjust the AC temperature & the blower speed depending upon the number of passengers in the car.
- 10.** Keep the blower ON with fan speed at level 3 or more for a few seconds & then switch OFF the engine. This will help maintain a pleasant smell in the car.
